

Only You Can Prevent Vaccine Loss

You are responsible for the vaccines you order.

Implement your vaccine management plan consistently to prevent vaccine loss!

- Order vaccines and quantities based on your patient populations!
- Put vaccine shipments away immediately! Never reject a vaccine shipment!
- Store vaccines under manufacturer-recommended temperatures at all times!
- Clearly label cartons with beyond-use dates following manufacturer guidance!
- Make sure refrigerator and freezer doors are closed!
- Record MIN, MAX, and CURRENT on your temperature logs twice daily!
- If temperatures are out of range, **take action immediately!**
- Rotate stock at least monthly to ensure short-dated vaccines are used first!
- Remove expired vaccine **immediately** to prevent administration errors!

Spoiled, expired, or wasted doses?

Report them at myCAVax and dispose of following practice protocols.

Have doses that will expire within 6 months and can't be used?

Notify the program contact prior to transferring to another active program provider to prevent negligent provider loss.
